

INF2009F – 2023 Business Case: Identifying Scope

Exercise 4 - Package Diagram (14 Marks)

Student Name: Alex Cristaudo

Student Number: CRSALE010

IMPORTANT NOTE:

- Copied or Plagiarised answers will get 0 and student will be referred to Elsje Scott or Ayanda Pekane for further action.
- Please upload your completed exercise on Vula by the 13th of March 2023 at 9am (9:00)

Please revisit the Khwela Womxn Case Study to remind you of the background and the current processes involved.

Draw a package diagram to represent the scope for the proposed system that will automate aspects of Moderator Training, Sister'hood' Circle Allocation and related logistics like the further distribution of Circle content via the WhatsApp bot.

Ensure that you indicate the dependencies between subsystems, as well as the existing systems. The diagram below depicts a three-tier layered structure that will include the Presentation Layer, the Business and the Database Layer. Complete the Business layer section of the given Package diagram. Add the necessary external systems that this system might need. **Include a narrative to briefly explain your thinking behind the diagram.**
