

Topics in Graph Theory - Comprehension Test

Instructions

Sign the declaration below. Read and understand the preliminaries below then attempt to solve the problem that follows. You may ask questions to attain clarity of definitions. Neatly compile your progress and submit a hardcopy of your answer or via email along with this signed declaration. Your submission may be a compact full answer, or it may first include your own examples which demonstrate understanding of the preliminary definitions (it's a good idea to include such examples especially if you don't manage to completely solve the question). Marks are awarded for presentation, style, completeness and correctness.

I, Alex Cristauda (name and surname) CRSALE010 (student number), declare that this submission is my own work.
